The Path Forward

Karen S. Evans

Vice Chairman, Federal Chief Information Officer's Council

Chief Information Officer, US Department of Energy

- Provide input to OMB for policy formulation
- Work with OMB to guide and shape such policy
- Develop and integrate the IT architecture governance process
- Establish agency workforce IT project management training programs
- Develop transaction standards for government
- Develop taxonomy and XML definitions that apply across government

- Reaching Green
  - Execute the Department's e-government strategy
    - 19 Core Projects including I-MANAGE
  - Continue IT A-76 functional review process
  - Develop and integrate the Department's CPIC process more fully into budget development
  - Increase the role of the federal architecture in agency IT investment decisions
  - Strengthen our cyber security posture with FISMA integration

- Cyber security at a glance:

  - Cyber security is a battle for supremacy

  - Culture of continual improvement

  - Ongoing revision of all cyber security policies and guidance

  - Certification of all unclassified systems

  - Providing IT security awareness training to all employees
